I have a deep appreciation for the night and often fantasize about being alone on a long highway, right at the center of the road. I imagine being in the forest with my favorite person, embarking on an adventurous trek. Water features, especially secluded waterfalls, hold a special allure for me. Spending time at a river place is best enjoyed with friends, while the beach is perfect for creating memories with family and friends. I have a great fondness for boating as well.

I find full moon days to be magical and believe they should be celebrated with at least 4-5 family members, much like a birthday or wedding celebration, surrounded by nature's beauty. Being on a mountain peak, with a majestic tree, a sprinkle of snowflakes, and clouds close by, alongside the person I love, would be an unforgettable experience.

Nature holds a special place in my heart, and its wonders bring me immense joy. Rain at night, in particular, fills me with a sense of tranquility and happiness. I have a desire to try eating snake at least once in my life, as a unique culinary experience.The rain, especially when I'm traveling, brings me great delight.I also enjoy playing with the sun's rays, particularly when they enter the house in the morning through the open door.

The interplay of sunlight and the fragrant smoke of agarbatti creates a mesmerizing effect with minute particles appearing in the rays of light. It's a truly fantastic sight.And there's something exhilarating about witnessing the dark clouds and thunder before a rainstorm while driving on a bridge. The combination of nature's elements in such moments is awe-inspiring.
